

Canon

USB Flatbed Scanner

CanoScan[®] N670U

- Featuring the advanced Z-Lid™ expansion top
- 600 x 1200 dpi resolution
- One cable for USB and power
- 48-bit for over 281-trillion possible colors
- Scan, click and burn photos onto CDs*
- Scan, copy or e-mail photos at the touch of a button

Great Scanning. Great Price.

The CanoScan N670U scanner is a truly remarkable addition to your home or workplace. Its intelligent, state-of-the-art features save you time, and the unbelievable price can save you money. Its sleek styling looks great on any desktop. And the results you'll achieve are simply spectacular.

The little scanner that delivers big results.

At just over one inch high, the N670U scanner is one of the smallest flatbed scanners in the world. It's also one of the easiest to set up and use. Connect with just a single USB cable to any compatible Mac[®] or PC—no power cord or bulky transformers are necessary. Then scan, copy or e-mail your images in just one step using the three convenient external buttons. You can even burn complete photos onto CDs* with ease. So it's easier than ever to take advantage of this scanner's full capabilities: remarkable 48-bit and 600 x 1200 dpi resolution that gives you over 281-trillion possible colors for richer, more robust scans. The accompanying stand allows you to stand up the N670U scanner to make room on your desk, and still use it to scan at anytime.

Scanning bulky items is easier than ever.

Canon's advanced Z-Lid expansion top will forever change the way you scan bulky items, such as books and magazines. Other scanner covers lift only at an angle

and become uneven and awkward when

scanning anything that isn't completely flat. The

N670U scanner includes a special expansion hinge

that lifts vertically and lays flat to create the space needed for bulky items, and to help ensure clear scans.

* Windows[®] only.

USB Flatbed Scanner

CanoScan N670U
