

Canon imagePASS-C2

Power and Flexibility that makes short-run digital color printing easy

For outstanding performance and color quality in a variety of print environments, count on the Canon imagePASS-C2. From corporate workgroups and small to mid-range businesses to print-for-pay and creative organizations, the Canon imagePASS-C2 is an intuitive and productive color solution.

The Canon imagePASS Print Controller, featuring EFI's Fiery System 7e software, offers a powerful foundation for office and corporate environments as well as creative and print-for-pay organizations. Along with exceptional usability, simplified workflow, comprehensive color management and support for variable data printing (VDP), the Canon imagePASS Print Controller is complete with powerful utilities that are all provided as standard features making it a potent solution for any color printing task.

Optional applications such as the EFI Color Profiler that offers finer control over color and print quality, and EFI Impose™ Fiery Edition that provides advanced booklet and imposition capabilities, add flexibility and functionality to the Canon imagePASS Print Controller and make it an excellent solution for all productive office, creative and print-for-pay environments.

Color

The Canon imagePASS Print Controller features EFI's in-RIP color management system, EFI Fiery ColorWise®, with standard-setting color tools and user flexibility. Fiery ColorWise delivers for both skilled and novice users with great "out of the box" color that is consistent across applications, computer platforms, color spaces, and color file formats with automated functionality and expert controls for managing color, productivity and automating color document workflow.

Productivity

With Fiery System 7e, the Canon imagePASS Print Controller is a robust utilization of SmartRIP® technology, productivity tools and logical workflows that drive increased performance for all users and is complete with tools like Fiery's Office Accelerator that

dramatically speeds printing of Microsoft Office and Adobe applications by providing an intelligent path through the image and graphic rich files that typically slow non-Fiery devices, and the Fiery RIP-and-Print utility that drives up to 30% more pages (per time period) through printers in demanding environments.

Connectivity

Featuring Fiery NetWise™, the Canon imagePASS Print Controller has an innovative design that virtually guarantees easy connectivity, including "peer-to-peer" (SNB) support for Windows® workstation printing and ensures seamless integration in any network environment. With the intuitive Fiery WebTools™ and network visibility through WebJet Admin, network administrators, lead operators and casual users all have access to easy job and device management from any platform via a Java-enabled web browser—providing a perfect solution for corporate intranets.

Security

As more devices are connected to corporate networks, protecting information contained in these devices is a priority. The Canon imagePASS Print Controller incorporates strong security utilities ranging from limiting who has access to the controller to securing the data itself. Administrators will have the ability to set general authentications, disable network ports and services, set IP filtering and implement supporting anti-virus software. With optional features like EFI Secure Erase, administrators and users will be able to take security to the next level by erasing data stored on the controller's hard drive, employing a three (3) pass overwriting protection to erase all traces of deleted information providing optimal security in any setting.

Canon imagePASS-C2

Specifications

Fiery System 7e Utilities

- EFI Driver
- Command WorkStation, Windows Edition
- Command WorkStation, Macintosh Edition
- EFI Fiery WebTools™

Fiery System 7e Options

- EFI Impose™ Fiery Edition
- EFI Secure Erase

Hardware

Intel Celeron Mobile Pentium @1.2GHz

- 256 MB DDR SDRAM
- 80 GB hard disk

EFI Video Interface Card

- Fiery RIPChips™
- ECT Compression for flexible compression ratios and visually lossless image quality

Networking/Connectivity

Simultaneous Autoswitching Protocols

- EtherTalk II
- TCP/IP
- Novell IPX

Autosensing Ports

- RJ45 for on-board 10/100/1000 Base-T and 10/100 Base-T
- Automatic IP configuration

SNMP Printing Support

- AppleTalk
- Pserver
- SMB (peer-to-peer)

Safety

- CE Mark
- CSA
- TUV/GS
- UL
- CB Scheme

EMC

- EN55022 Part B (CE marked)
- FCC Class B
- VCCI II

Power Supply and Consumption

- Auto Switching Power Supply with active PFC (Power factor Correction) AC ~ Input from 100V up to 240V AC~ Current 4-2A 60-50Hz
