

Simplify the Staging Process

ABOUT CANON'S INSTALLATION SUPPORT SERVICE

The Installation Support Service (ISS) provides a consistent and time-saving method of applying settings, firmware, and select MEAP® applications to devices during the staging process.

Dealer Benefits:

- Cost reduction in the staging process
- Stronger and simpler collaboration within an organization
- Up-to-date Installation Model

Customer Benefits:

- Consistency across all devices

Back Up Your Data

ABOUT CANON'S DATA BACKUP SERVICE

Data Backup Service (DBS) performs periodic data backup from supported imageRUNNER ADVANCE and imagePRESS models to the cloud to help preserve data integrity and easily restore device settings to one of your three (3) latest backed-up configurations if needed. Among those settings are User mode, Service mode, Configuration, and Address Book.

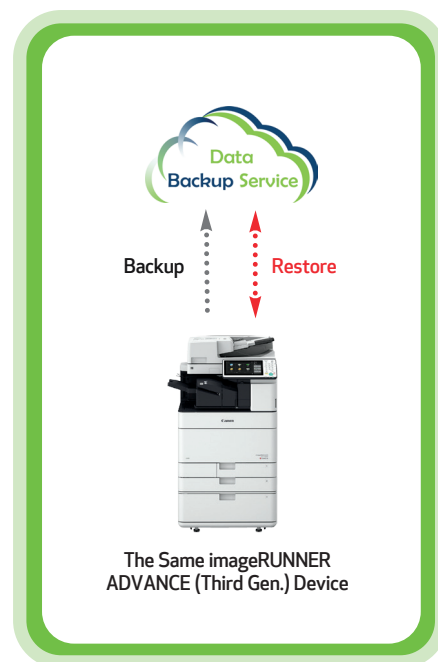

Dealer Benefits:

- Automated scheduled backup
- Expedite device restoration process

Customer Benefits:

- Safely save device data for customer
- Increase customer device uptime

Streamlined Data Restoration

EASILY MIGRATE INFORMATION FROM ONE DEVICE TO ANOTHER

Reduce device replacement time and easily migrate information from one device to another with Canon's Data Backup Service (DBS) and Installation Support Service (ISS). DBS provides a method for migrating data from one supported Canon device to another, making switching devices efficient and providing a consistent user experience across models when applying using ISS.

Dealer Benefits:

- Remote collection of the existing device data
- Streamline the device replacement process

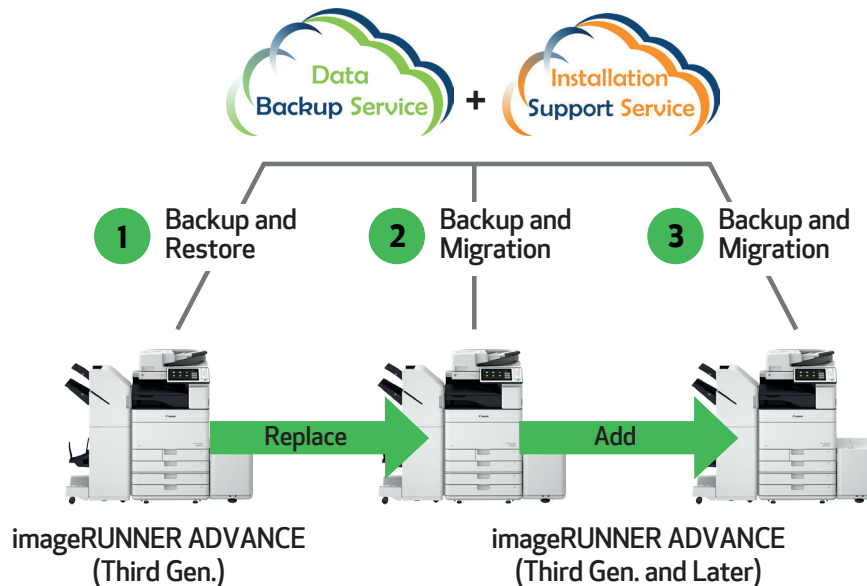

Customer Benefits:

- Consistency across all devices

Migration Feature

Ability to apply backup data from source device to new and/or multiple devices.

For more information about Data Backup Service, contact your local Canon Authorized Dealer.
